Physically based parameterizations of the short-wave radiative characteristics of weakly absorbing optically thick media: application to liquid-water clouds: erratum

Alexander A. Kokhanovsky, Teruyuki Nakajima, and Eleonora P. Zege

OCIS codes: 010.1290, 260.2160, 280.1310, 290.1090, 290.1310, 290.4210.

Equation (A8) in Ref. 1 should read as follows:

$$R(\mu, \mu_0) = \Upsilon_0\left(\frac{1}{2} + \frac{\mu\mu_0}{\mu + \mu_0}\right) + \frac{\Upsilon_1 p(\theta)}{4(\mu + \mu_0)}.$$

A. A. Kokhanovsky is with the Institute of Particle Technology and Environmental Engineering, Clausthal Technical University, Leibnizstrasse 19, D-38678 Clausthal—Zellerfeld, Germany. T. Nakajima is with the Center for Climate System Research, University of Tokyo, 4-6-1 Komaba, Meguro-ku, Tokyo 153, Japan. E. P. Zege is with the Institute of Physics, Academy of Sciences of Belarus, 70 Skarina Avenue, Minsk 220072, Belarus.

Received 21 October 1998.
